

CHEMIGATION Guidelines for British Columbia

♦ Table of Contents ♦

This factsheet lists information in the *Chemigation Guidelines for British Columbia* published book. Chemigation is the term used to define the practice of applying chemicals to a crop through an irrigation system. Listed are seven chapters and some additional information as shown on page 5.

Individual chapter topics may be downloaded at no cost directly to your printer from our website. **All** the chapters listed in this **Table of Contents** make up the *Chemigation Guidelines for British Columbia*. Print all the chapters to your own printer or [order the published book](#) for a fee from the Irrigation Association of British Columbia.

ACKNOWLEDGEMENT

This manual was prepared under the auspices of a steering committee comprised of members representing the Okanagan Valley Tree Fruit Authority, Irrigation Industry Association of British Columbia, Association of British Columbia Irrigation Districts, Agriculture Canada, British Columbia Fruit Growers Association, and the Ministry of Agriculture, Fisheries and Food.

The following individuals provided extensive comments on the initial draft and subsequent versions of the publication.

Erich Schulz	- Engineering Technologist, BCMAFF
Lance Brown	- Engineering Technologist, BCMAFF
Peter Parchomchuk	- P.Eng. Agriculture Canada
Sie-tan Chieng	- P.Eng. Bio - Resource Engineering, UBC
Peter Waterman	- P. Ag. Horticulturist, BCMAFF

Appreciation is also extended to Linda Hokanson for preparation of the drawings and final layout of the publication.

TABLE OF CONTENTS

1.	Introduction	1-1
2.	Laws and Regulations Affecting Chemigation	
	2.1 Federal Legislation	2-1
	2.2 Provincial Legislation	2-1
	2.3 Codes and Bylaws	2-3
	2.4 Standards	2-4
3.	Chemigation Considerations	
	3.1 Advantages	3-1
	3.2 Disadvantages	3-3
	3.3 Irrigation System Design Considerations	3-4
	3.4 Irrigation System Operation Considerations	3-7
4.	Cross Connection Control	
	4.1 Why is Chemigation a Potential Hazard	4-1
	4.2 Backflow Prevention Device Selection	4-2
	4.3 Guidelines for Pesticide, Herbicide and Insecticide Application	4-8
	4.4 Injection System Requirements	4-9
	4.5 Backflow Prevention Requirements	4-10
	4.6 Additional Precautions	4-12
5.	Chemical Selection	
	5.1 Selection Criteria	5-1
	5.2 Fertilizers	5-1
	5.3 Herbicides	5-9
	5.4 Pesticides	5-10
6.	Injection Equipment	
	6.1 Injector Selection	6-1
	6.2 Passive Injectors	6-2
	6.3 Active Injectors	6-6
	6.4 Injector Calibration	6-10
7.	Calculating Injection Rates	
	7.1 Determining a Method of Calculating Injection Rates	7-1
	7.2 Calibrating an Injection Pumping System	7-2
	7.3 Batch Chemigation Examples	7-3
	7.4 Continuous Move Chemigation Examples	7-10
Appendix A	Sample Chemigation Bylaw	A-1

Glossary

Bibliography

LIST OF FIGURES

Figure 3.1	Solute Dispersal Along Irrigation System	3-8
Figure 4.1	Double Check Valve Assembly	4-4
Figure 4.2	Reduced Pressure Backflow Prevention Principle Device	4-6
Figure 4.3	DCVA or RPBD Installation - Above Ground	4-7
Figure 4.4	DCVA or RPBD Installation - Below Ground	4-7
Figure 4.5	Injector System Arrangement	4-9
Figure 6.1	Pitot Tube Injector	6-3
Figure 6.2	Pressure Differential Injection System	6-4
Figure 6.3	Venturi Injection System	6-5
Figure 6.4	Metering Injection Pump	6-8
Figure 6.5	Water Turbine Driven Injector	6-9
Figure 6.6	Piston Drive Injection System	6-10

LIST OF TABLES

Table 3.1	Irrigation System Uniformities	3-6
Table 3.2	Hand Feel Moisture Test	3-10
Table 3.3	Depth of Water Penetration (inches) per Inch of Water Applied	3-10
Table 5.1	Granular Fertilizer Properties	5-3
Table 5.2	Fertilizer Solutions	5-5
Table 5.3	Typical Grades of Clear Liquid Mixes and Suspension	5-6
Table 5.4	Inorganic Sources of Micronutrients	5-8
Table 6.1	Venturi Injector Selection	6-6
